Lock body won't be hot by continuous working; anti-damage, more safe. High quality steel lock bolt, 1,000,000 popup test, wear resistance and won't stuck, instantaneous power to lock, power off to open.

Features

- 1.MX-630EEBS has all-metal body with timer and self-locking.
- 2.Simple to install, just need eight screws.
- 3.Special hexagonal screw , more safety and stability.
- 4.Suitable for narrow door (Such as Wooden & Aluminum & Glass & Fireproof & Metal door).

Specification

Model	MX-630EEBS
version	Fail-safe
voltage	DC10-15V

MX-630EBS

External installation electric bolt lock

current	450MA
Installation method	Hanging ,Surface mounting,Top mounting,side mounting
Face place material	High Aluminum
Surface Temp	Low Temperature
Suitable for	External Installation For Narrow Door (Such as Wooden & Aluminum & Glass & Fireproof &Metal door)
Strike Dimensions	150*36*26mm
Plate Dimensions	86*32*26mm
Weight in kg	0.5kg
CE-mark for building	YES
Rohs-mark for building	YES
